

BY SMITA SARASWAT • JODHPUR ATELIER

Complete o-to-1 Cloud Setup & Netlify Guide

Ground-Zero Account Creation & Production Deployment Manual

Namaste! If you are setting up **Vitasta Saree Atelier** for the very first time from scratch, follow this comprehensive step-by-step guide. You will set up 5 core cloud services (Database, Media CDN, Google Login, Razorpay Gateway, and Netlify Hosting) and launch your royal store live in under 20 minutes!

STEP 1

Neon Database

Serverless PostgreSQL for sarees & orders

STEP 2

Cloudinary

High-res photos & loom inspection videos

STEP 3

Google Login

1-Click customer sign-in with Google

STEP 4

Razorpay

Instant UPI, QR, Cards & NetBanking

STEP 5

Netlify Deploy

Deploy from GitHub repository live

1 Create Database on Neon (Free Tier)

Database

Neon provides a serverless PostgreSQL database with pooled connections to store your sarees, orders, patron shortlist, addresses, and customer reviews.

1. Go to <https://neon.tech> and click **"Sign Up"** (you can sign up with your Google or GitHub account).
2. Click **"Create a Project"**:
 - **Project name:** vitasta-atelier
 - **Region:** Select Asia Pacific (Singapore) or closest to India.
 - **Postgres version:** Default (16 or 17).
3. Click **"Create Project"**.
4. On the dashboard under **Connection Details**:
 - Check the box for **"Pooled connection"** (required for serverless scaling).
 - Select **Prisma** or **Node.js** connection string format.
5. Copy your entire connection string. It will look like this:

```
# Your DATABASE_URL:
DATABASE_URL="postgresql://neondb_owner:YOUR_PASSWORD@ep-young-dust-aoun8xk9-pooler.c-2.ap-southeast-1.aws.neon.tech/neondb?sslmode=require&schema=vitasta"
```

Pro Tip: Append `&schema=vitasta` to the end of the connection URL to ensure all relational tables are neatly organized in your atelier schema.

2 Create Media Storage on Cloudinary (Free Tier)

Photos & Video CDN

Cloudinary provides global edge media delivery for ultra-fast 4K saree drape photography and pre-dispatch Loom inspection videos.

1. Go to https://cloudinary.com/users/register_free and create a free account.

2. Once logged in, look at your main **Dashboard** under "**Product Environment Credentials**".

3. You will see three values:

- **Cloud Name** (e.g. sj11rfvu)
- **API Key** (e.g. 278911177331486)
- **API Secret** (click the eye icon to reveal)

```
CLLOUDINARY_CLOUD_NAME="YOUR_CLOUDINARY_CLOUD_NAME"
CLLOUDINARY_API_KEY="YOUR_CLOUDINARY_API_KEY"
CLLOUDINARY_API_SECRET="YOUR_CLOUDINARY_API_SECRET"
```

3 Create Google 1-Click Login (Google Cloud)

Google Sign-In

Allows royal patrons to authenticate and register with one tap using their Google accounts.

1. Go to <https://console.cloud.google.com> and sign in with your business Google account.
2. Click the project dropdown at the top > click "**New Project**" > Name it Vitasta Saree Atelier > click **Create**.
3. In the search bar, type "**OAuth consent screen**" and open it:
 - User Type: **External** > click **Create**.
 - App name: Vitasta Saree Atelier
 - User support email: vitastabysmita@gmail.com
 - Developer contact: Your email.
 - Click **Save and Continue** through the scopes and test users.
4. In the left sidebar, click "**Credentials**" > click "**+ CREATE CREDENTIALS**" > select "**OAuth client ID**":
 - Application type: **Web application**.
 - Name: Vitasta Web Client.
 - **Authorized JavaScript origins**: Add your Netlify URL or custom domain (e.g. <https://vitasta.luxury> or <https://vitasta-atelier.netlify.app>).
 - **Authorized redirect URIs**: Add your domain followed by /api/auth/callback/google (e.g. <https://vitasta.luxury/api/auth/callback/google>).
5. Click **Create**. A popup will display your **Client ID** and **Client Secret**.

```
GOOGLE_CLIENT_ID="YOUR_GOOGLE_CLIENT_ID.apps.googleusercontent.com"
GOOGLE_CLIENT_SECRET="YOUR_GOOGLE_CLIENT_SECRET"
```

4 Setup Razorpay Online Payment Gateway

Payments (UPI / Cards)

Accept instant online payments from patrons across India via UPI (Google Pay, PhonePe, Paytm), QR Code, Credit/Debit Cards, NetBanking, and EMI.

1. Go to <https://razorpay.com> and click "**Sign Up**".
2. Complete the quick business onboarding (Individual / Proprietorship / Private Limited).
3. In your Razorpay Dashboard, navigate to **Account & Settings** (or **Developer Controls**) > **API Keys**.
4. Click "**Generate Key**" (you can start in **Test Mode** or **Live Mode**):
 - **Key ID**: Starts with rzp_live_... (or rzp_test_... for testing).
 - **Key Secret**: Copy and store securely (displayed once upon generation).

```
# Razorpay Online Payment Gateway Keys:
RAZORPAY_KEY_ID="rzp_live_YOUR_KEY_ID"
RAZORPAY_KEY_SECRET="YOUR_KEY_SECRET"
NEXT_PUBLIC_RAZORPAY_KEY_ID="rzp_live_YOUR_KEY_ID"
```

Automatic Fallback: In local testing or sandbox mode without live keys, Vitasta provides an automated demo verification handler so checkout flows can be fully tested end-to-end.

5 Deploy on Netlify via Your GitHub Repository

Live Deployment

Deploy directly from your public GitHub repository to Netlify with automatic continuous deployment on every Git push.

Official GitHub Repository for Vitasta:

<https://github.com/Er-Mayank-Aggarwal/Vitasta>

1. Make sure your GitHub repository is set to **Public** (or grant Netlify access to your private repository).
2. Go to <https://app.netlify.com> and sign in (using your GitHub account).
3. Click **"Add new site"** > select **"Import an existing project"** > choose **GitHub**.
4. Search and select your repository: Er-Mayank-Aggarwal/Vitasta.
5. Under **Build settings**, Netlify will auto-detect Next.js:
 - **Build command:** `npm run build` (which executes `prisma generate && next build`)
 - **Publish directory:** `.next`
6. Click on **"Add environment variables"** (or navigate to **Site configuration > Environment variables**).
7. Copy and paste the entire master list below into your Netlify variables!

```
# =====  
# MASTER ENVIRONMENT VARIABLES (Paste into Netlify Dashboard)  
# =====  
  
DATABASE_URL="postgresql://neondb_owner:YOUR_DATABASE_PASSWORD@YOUR_NEON_HOST-pooler.c-2.ap-southeast-1.aws.neon.tech/neondb?sslmode=require&schema=vitasta"  
BETTER_AUTH_SECRET="fn/sIN6//a6izWd3gmKk4Dj7Y4MeMJh5+fimMHwschA="  
BETTER_AUTH_URL="https://your-site.netlify.app"  
NEXT_PUBLIC_APP_URL="https://your-site.netlify.app"  
GOOGLE_CLIENT_ID="YOUR_GOOGLE_CLIENT_ID.apps.googleusercontent.com"  
GOOGLE_CLIENT_SECRET="YOUR_GOOGLE_CLIENT_SECRET"  
CLOUDINARY_CLOUD_NAME="YOUR_CLOUDINARY_CLOUD_NAME"  
CLOUDINARY_API_KEY="YOUR_CLOUDINARY_API_KEY"  
CLOUDINARY_API_SECRET="YOUR_CLOUDINARY_API_SECRET"  
RAZORPAY_KEY_ID="rzp_live_YOUR_RAZORPAY_KEY_ID"  
RAZORPAY_KEY_SECRET="YOUR_RAZORPAY_KEY_SECRET"  
NEXT_PUBLIC_RAZORPAY_KEY_ID="rzp_live_YOUR_RAZORPAY_KEY_ID"  
NEXT_PUBLIC_ENABLE_DEMO_LOGIN="false"
```

8. Click **"Deploy Vitasta"**.
9. Netlify will automatically build and publish your site with a free SSL certificate!

First Time Admin Access: Once deployed, your products and default admin account (`admin@vitasta.com`) are ready in the database. Navigate to `/admin-controls` to manage your orders and saree catalog!

Quick Reference: All 13 Environment Variables

VARIABLE KEY	SERVICE / PURPOSE	WHERE TO GET IT
DATABASE_URL	Neon PostgreSQL (Pooled)	Neon Console > Project > Connection String
BETTER_AUTH_SECRET	256-bit Session Encryption Key	Pre-generated 256-bit key ready in this guide
BETTER_AUTH_URL	Live Production Domain URL	Your Netlify URL or custom domain (e.g. https://vitasta.luxury)
NEXT_PUBLIC_APP_URL	Public Frontend Domain	Same live production URL with <code>https://</code>
GOOGLE_CLIENT_ID	Google Cloud OAuth	Google Cloud Console > APIs & Services > Credentials
GOOGLE_CLIENT_SECRET	Google Cloud OAuth Secret	Google Cloud Console OAuth Client ID popup
CLOUDINARY_CLOUD_NAME	Cloudinary Account Name	Cloudinary Dashboard > Account Details
CLOUDINARY_API_KEY	Cloudinary Access Key	Cloudinary Dashboard > API Key
CLOUDINARY_API_SECRET	Cloudinary Private Secret	Cloudinary Dashboard > API Secret
RAZORPAY_KEY_ID	Razorpay API Key ID	Razorpay Dashboard > API Keys
RAZORPAY_KEY_SECRET	Razorpay API Secret	Razorpay Dashboard > API Keys (Generated key)
NEXT_PUBLIC_RAZORPAY_KEY_ID	Public Razorpay Key ID	Same Razorpay Key ID for client-side checkout
NEXT_PUBLIC_ENABLE_DEMO_LOGIN	Production Security Toggle	Set to <code>false</code> to disable 1-click test buttons in production
